

## Governing digital security: Olidata's approach at the Innovation Cybersecurity Summit

*The Rome-based company confirms its participation and sponsorship at the two-day event dedicated to in-depth discussion and dialogue among the various public and private stakeholders in the national and international technology ecosystem*

**Rome, Monday 13 April 2026 - Olidata S.p.A.**, a system integrator listed on Euronext Milan, will participate as a sponsor at the **VI edition of Innovation Cybersecurity Summit**, scheduled in Rome on **14 and 15 April 2026** at the premises of **Marconi Telematic University** at **Palazzo Simonetti-Odescalchi**.

The event, under the patronage of the National Cybersecurity Agency (ACN), the Agency for Digital Italy (AGID), Anitec-Assinform, Assintel and Clusit, and in collaboration with the Offices of the European Parliament in Italy, is one of the key national events on the subject, bringing together experts, institutions, the Defence and intelligence community, and businesses for a high-level analytical and operational discussion on the evolution of digital threats.

In this context, **Cristiano Rufini, Chairman of Olidata**, will speak on one of the Summit's prestigious panels on the second day, bringing the Group's vision on cybersecurity governance through national strategies and corporate resilience in the era of artificial intelligence:

*"Digital security is one of the areas that measures the strength of our national system. This is why it is essential to invest in skills and technologies developed in Italy. Olidata believes in a structured approach to cybersecurity, capable of combining prevention, resilience and industrial vision",* states **Cristiano Rufini**, Chairman of Olidata.

Olidata's commitment to cybersecurity is complemented by a broader industrial strategy: the return to manufacturing PCs, notebooks and tablets with entirely Italian design, as well as the recent establishment of Olidata Cybersecurity S.r.l, a new company specialising in advanced cybersecurity services, which aims to consolidate the Group's position in the sector.

Participation in the Innovation Cybersecurity Summit therefore confirms the direction taken: to actively contribute to the debate on digital security and the country's resilience in all its facets, bringing concrete solutions and a technology vision developed in Italy.

### **Olidata**

Olidata S.p.A., headquartered in Rome with operations across the national and international territory, is an active System Integrator in the digital services sector operating in B2A and B2B markets, offering complete solutions in the fields of cybersecurity, Big Data, artificial intelligence, software development and the design of GIS and IoT systems.
